A Small Group - Based Course Over 3 Days

Cadaveric & Surface Anatomy

Ultrasound & Multimedia - based Teaching

In-Theatre Practical Demonstrations

Background Theory

Course Textbook, Meals & Refreshments,
Inter-Site Transport Included

The Leeds Regional Anaesthesia Course is designed specifically for consultants and senior specialist registrars with an interest in peripheral nerve block techniques.

This course is held in Leeds over 3 days and uses the facilities of the anatomy department of The University of Leeds, The Hand and Plastic Surgery Day Unit of Leeds General Infirmary (a combined orthopaedic and plastic surgery unit) and Chapel Allerton Orthopaedic Centre.

The course is designed to provide expert in-depth instruction, bringing together the most up-to-date technology and techniques. Expertly prepared cadaver specimens, live models, high quality multi-media resources, ultrasound-guided techniques and in-theatre demonstrations on selected patients combine to make this one of the most advanced courses of its kind in the United Kingdom.

Pre-course material includes the textbook/DVD *Peripheral Nerve Blocks and Peri-Operative Pain Relief*

15 CPD points approved by the Royal College of Anaesthetists
